## SERVICES

| | |
|---|---|
| **Custom Software** | Desktop apps, tools and utilities — for Windows, macOS and every Linux distro. From $1,200. |
| **Websites & Landing Pages** | Fast, beautiful websites that turn visitors into customers. From $750. |
| **Web Apps & SaaS** | Dashboards, portals and SaaS products — from MVP to platform. From $6,000. |
| **Automation & AI** | Bots, scrapers, workflows and AI that take busywork off your plate. From $450. |
| **Linux, Infra & Support** | Linux setups, servers and the ops work that keeps everything running. From $250. |

## STACK

| | |
|---|---|
| **Systems & Infra** | Linux / systemd · Kubernetes · Terraform / Nix · Observability (OTel) |
| **Backend** | Go · Rust · Python · PostgreSQL · Kafka / NATS |
| **Frontend** | TypeScript · React / Preact · Astro / SvelteKit · WebGL / Canvas |
| **Data & ML** | pandas / Polars · scikit-learn · PyTorch · dbt / DuckDB · Forecasting |

## SELECTED WORK

- **MuneBound Platform**: This site. A static Astro front-end on GitHub Pages plus a Cloudflare Worker API for intake, native booking and crypto invoices — with an admin dashboard, alerts and zero monthly hosting cost.
- **Bazzite Desktop (dev mode)**: A riced Linux desktop that runs in the browser — tiling window manager, a real shell with 70 commands, a WebGL wallpaper, live GitHub data and Python compiled to WebAssembly.
- **Free Tools Suite**: Eight privacy-friendly calculators and quizzes — career matching, resume keyword matching, offer comparison, freelance rates, debt payoff, SaaS metrics, website audits and a Linux distro picker.
